Context for Teaching and Learning**

Home/School Communication

DIRECTIONS: Maintaining a running account of your contacts is important in establishing a working relationship with families/care providers. With your support provider, respond to the prompts below. Upload a sample blank home/school communication document you are using with your students and families/care providers.

1. What strategies am I using to ensure positive communication with my students and their families/care providers?

2. How can I best communicate with hard-to-reach parents, families, and care providers? What adjustments will I make to be more accessible to parents, families, and care providers (i.e., before and/or after school)?
